PROFESSIONAL SUMMARY

Frontend-focused Software Developer with hands-on experience building modern, responsive, and scalable web applications using Next.js, React, TypeScript, and Tailwind CSS. Experienced in developing application interfaces, authentication systems, dashboards, forms, API integrations, and database-driven platforms. Expanding into backend development with Node.js, Express, MongoDB, authentication, email services, API security, and server-side architecture. Strong interest in building practical software solutions with clean interfaces, reusable components, responsive design, and maintainable code.

CORE SKILLS

Frontend Development: Next.js · React · TypeScript · Tailwind CSS · Framer Motion · React Hook Form · Zod · shadcn/ui · Radix UI

Backend Development: Node.js · Express.js · MongoDB · REST APIs · CORS · Authentication & Authorization · NextAuth.js · SMTP · Nodemailer · Resend · Google Authentication

Tools & Practices: Git · GitHub · VS Code · API Development · Database Integration · Responsive Web Design · Role-Based Access Control · Form Validation · Dashboard Development

PROFESSIONAL EXPERIENCE

Independent Software Developer

Web Development & Full-Stack Projects | 2024 – Present

- Design and develop modern web applications using Next.js, React, TypeScript, and Tailwind CSS.
- Build responsive and reusable user interfaces for desktop, tablet, and mobile devices.
- Develop backend services and REST APIs using Node.js and Express.js.
- Integrate MongoDB for application data storage and management.
- Implement authentication and authorization using NextAuth.js, JWT, and role-based access control.
- Build validated forms using React Hook Form and Zod.
- Integrate transactional email services using Nodemailer, SMTP, and Resend.
- Develop administrative dashboards and role-specific platforms.
- Use Git and GitHub for source-code management and project development.

FEATURED PROJECTS

ALIFAT CONNECT

VTU, Airtime & Data Subscription Platform

A web-based digital service platform for airtime and data subscriptions, bill payments, and related digital services.

Live Project: https://alifat-connect.vercel.app/
Technologies: Next.js · TypeScript · Tailwind CSS · MongoDB · NextAuth.js

- Built the application using Next.js and TypeScript.
- Developed responsive interfaces with Tailwind CSS.
- Integrated MongoDB for application data management.
- Implemented user authentication with NextAuth.js.
- Developed functionality for digital service transactions and account management.

ITMT MANAGEMENT SYSTEM

School Management & Administration Platform

A full-stack school management system designed to support academic, administrative, financial, admissions, lecturer, and student management workflows.

Live Project: https://itmt-management.vercel.app/
Technologies: Next.js · TypeScript · Tailwind CSS · Node.js · Express.js · MongoDB · Zod · CORS

- Developed the frontend using Next.js, TypeScript, and Tailwind CSS.
- Built REST APIs using Node.js and Express.js.
- Integrated MongoDB for institutional data management.
- Implemented role-based dashboards for administrators, registrars, finance staff, lecturers, and students.
- Developed authentication and authorization workflows.
- Implemented form and API validation using Zod.
- Built responsive dashboards and reusable UI components.

- Developed academic workflows including courses, lecturer assignments, attendance, results, registrations, transcripts, and reporting.
- Implemented admission and student-management workflows.

EDUCATION

Associate Degree in Shipping Management
Institute of Transport and Management Technology (ITMT) | August 2022 – November 2024

TECHNICAL PROFILE

Frontend: Next.js, React, TypeScript, Tailwind CSS, Framer Motion, React Hook Form, Zod, shadcn/ui, Radix UI
Backend: Node.js, Express.js, MongoDB, REST APIs, CORS, Authentication & Authorization
Authentication & Communication: NextAuth.js, Google Provider, JWT, SMTP, Nodemailer, Resend
Tools: Git, GitHub, VS Code
